NTP Technical Report on Toxicity Studies of

Cadmium Oxide

(CAS No. 1306-19-0)

Administered by Inhalation to F344/N Rats and B6C3F₁ Mice

June K. Dunnick, Ph.D., Study Scientist
National Institute of Environmental Health Sciences
Post Office Box 12233
Research Triangle Park, NC 27709

NIH Publication 95-3388 March 1995

United States Department of Health and Human Services
Public Health Service
National Institutes of Health

Note to the Reader

The National Toxicology Program (NTP) is made up of four charter agencies of the United States Department of Health and Human Services (DHHS):

- the National Cancer Institute (NCI) of the National Institutes of Health;
- the National Institute of Environmental Health Sciences (NIEHS) of the National Institutes of Health;
- the National Center for Toxicological Research (NCTR) of the Food and Drug Administration; and
- the National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control.

In July 1981, the Carcinogenesis Bioassay Testing Program was transferred from NCI to NIEHS. NTP coordinates the relevant Public Health Service programs, staff, and resources that are concerned with basic and applied research and with biological assay development and validation.

NTP develops, evaluates, and disseminates scientific information about potentially toxic and hazardous chemicals. This knowledge is used for protecting the health of the American people and for the primary prevention of disease.

To carry out its mission, NTP designs and conducts studies to characterize and evaluate the toxicologic potential of selected chemicals in laboratory animals (usually two species, rats and mice). Chemicals selected for NTP toxicology studies are chosen primarily on the bases of human exposure, level of production, and chemical structure. Selection per se is not an indicator of a chemical's toxic potential.

The studies described in this toxicity study report were performed under the direction of NIEHS and were conducted in compliance with NTP laboratory health and safety requirements. These studies met or exceeded all applicable federal, state, and local health and safety regulations. Animal care and use were in accord and compliance with the Public Health Service Policy on Humane Care and Use of Animals.

Single copies of this report are available without charge, while supplies last, from the NTP Public Information Office (telephone number 919/541-3419).

CONTRIBUTORS

This NTP report on the toxicity studies of cadmium oxide is based primarily on 2-week studies conducted in November and December 1988 and on 13-week studies that began in August 1989 and ended in November 1989 at Battelle Pacific Northwest Laboratories, Richland, WA.

National Toxicology Program

Evaluated experiment, interpreted results, and reported findings

June K. Dunnick, Ph.D., Study Scientist

John R. Bucher, Ph.D.

Robert E. Chapin, Ph.D.

Rajendra S. Chhabra, Ph.D.

Michael R. Elwell, D.V.M., Ph.D.

Thomas J. Goehl, Ph.D.

Joel Mahler, D.V.M.

Ghanta N. Rao, D.V.M., Ph.D.

Joseph H. Roycroft, Ph.D.

Gregory S. Travlos, D.V.M.

Kristine L. Witt, M.S.

Oak Ridge Associated Universities

Battelle Pacific Northwest Laboratories

Principal contributors for 13-week studies

Billy J. Chou, D.V.M., Ph.D.,

Principal Investigator

Jeffrey A. Dill, Ph.D.

Bernard J. Greenspan, Ph.D.

Chester L. Leach, Ph.D.

Paul W. Mellick, D.V.M., Ph.D.

Roger A. Miller, D.V.M., Ph.D.

Harvey A. Ragan, D.V.M.

Principal contributors for developmental toxicity studies

Terryl J. Mast, Ph.D., Director

Billy J. Chou, D.V.M., Ph.D.

Jeffrey A. Dill, Ph.D.

Bernard J. Greenspan, Ph.D.

Experimental Pathology Laboratories, Inc.

Provided pathology quality assessment

Deborah A. Banas, D.V.M., M.S.

NTP Pathology Working Group

Evaluated slides and prepared pathology report

John C. Seely, D.V.M., Chair

PATHCO, Inc.

Michael R. Elwell, D.V.M., Ph.D.

National Toxicology Program

Jeffery Everitt, D.V.M.

Chemical Industry Institute of Toxicology

Joel Mahler, D.V.M.

National Toxicology Program

Robert C. Sills, D.V.M., Ph.D.

National Toxicology Program

Analytical Sciences, Inc.

Provided statistical analyses

Steven Seilkop, M.S.

Janet L. Teague, M.S.

Environmental Health Research and Testing,

Inc.

Provided sperm motility and vaginal cytology evaluation

Teresa Cocanougher, B.A.

Dushyant K. Gulati, Ph.D.

Susan Russell, B.A.

Biotechnical Services. Inc.

Provided toxicity report preparation

Daphne D. Lambright, Principal Investigator

C. Michael Bailey, B.S. Pharm.

Sophonia A. Roe, B.S.

PEER REVIEW

The draft report on the toxicity studies of cadmium oxide was evaluated by the reviewers listed below. These reviewers serve as independent scientists, not as representatives of any institution, company, or governmental agency. In this capacity, reviewers determine if the design and conditions of these NTP studies are appropriate and ensure that the toxicity study report presents the experimental results and conclusions fully and clearly. The comments of the reviewers were received and reviewed prior to the finalization of this document. Changes have been made such that the concerns of the reviewers have been addressed to the extent possible.
